

QUALITY, ENVIRONMENTAL, AND OCCUPATIONAL HEALTH AND SAFETY POLICY

AUSA Center, S.L.U. designs, develops, manufactures and sells industrial vehicles under the AUSA brand with the aim of offering customers the best possible solution. Therefore, we have an Integrated Management System (IMS) that meets the requirements of the Quality (ISO 9001), Environmental (ISO 14001) and Occupational Health and Safety (OHSAS 18001) standards.

AUSA's quality policy is aimed at meeting the implicit and explicit requirements of the market and our customers, thus enabling us to offer our products, after-sales services and spare part services with the level of quality that the AUSA brand and our customers expect. For this purpose, we use the latest tools that new technologies offer us in all of our processes.

In AUSA, the environmental policy is designed to identify the potential and actual environmental impacts of our activities, not only in production, but also during the entire life cycle of our products and services, ensuring that they are controlled and allowing us to establish the necessary actions to prevent, reduce or eliminate them.

AUSA remains firm in its long-standing commitment to protect the environment, including the prevention of pollution and all specific environmental commitments that arise in relation to our activities.

The aim of AUSA's occupational health and safety policy is to foresee any possible harm or damage to the health of AUSA's workers and establishing a prevention-based health and safety system in the workplace that eliminates the hazards inherent in each job.

In AUSA we are not only committed to meeting the legal and regulatory requirements in the activities that we perform and the products that we manufacture, we also strive to be industry leaders in accident prevention.

To ensure continuous improvements, in AUSA we listen to the needs and expectations of the company's staff, our customers, our suppliers, our shareholders and of the wider community where we operate, establishing relationships of trust, managing any hazards associated with our activity and establishing actions that allow us to correct and adapt our processes and the company's strategy to deal with the constant changes that we continuously face.

Therefore, in AUSA we believe that it is necessary to define our principles of action in the form of Quality, Environmental and Occupational Health and Safety policies, in which we make the commitment to implement and maintain an IMS that enables us to meet the objectives set by our organisation at all levels. These objectives are monitored, audited and regularly and systematically reviewed in order to ensure the effectiveness of our IMS. Through our CEO, our board of directors provides the necessary resources at all levels to meet these objectives.

The Company Policy regarding AUSA's IMS is reported and disseminated at all levels of the organisation and is available to all external organisations.
